

Delivering more sustainable buildings

Join us for this **NEW** programme, our first immersive learning on a live project, starting in March 2018.

Second Nature LIVE supports our aim to make sustainable development second nature to all.

In this exciting new programme you'll learn and apply skills to a live project - Birmingham's Children's Hospital. You and your peers will work collaboratively to discuss, test and propose the most effective ideas for sustainable outcomes.

Working within this professional network will improve understanding between disciplines and ensure a more holistic approach to problem solving. Along the way, you will be supported by industry experts and a range of learning tools, including talks, webinars, workshops, site visits and much more.

Armed with the latest innovations, best practice and applications, you will identify strategic opportunities and put together your case for effectively implementing sustainability at Birmingham's Children's Hospital.

THE RIGHT COURSE FOR YOU

- Do you work as an architect, technician, designer, engineer, project manager, surveyor, construction manager, cost consultant, facilities/operations manager, product manufacturer, developer, client, academic or instructor
- Do you have over 5 years' professional experience in the built environment or line manager experience
- Are you involved at any stage of a project - conception to design, construction and beyond

Previous sustainability knowledge is not required.

KEY LEARNING OUTCOMES

- You will take away a greater understanding of key sustainability issues, and be equipped with the tools and solutions
- You will explore the latest innovations and discover industry best practice
- You will learn to identify strategic opportunities and how to present a commercial case for sustainability
- You will be able to apply your learnings from this live development to improve sustainability across your own future projects
- 32 CPD hours and a 'Green Building Champion Certificate'

Cost: £795 for members. £1295 for non-Members. 25% Early Bird discount available.

Any questions: Contact us at emma.deady@ukgbc.org

This is a training experience and will focus on a real life building. However, none of the output ideas or strategies put forward are proposals for adoption by the building owners. Nor will this opportunity replace the need for such stakeholders to procure stand-alone professional advice on any aspects related to the development.
