

# From awareness to leadership

## Let UKGBC guide your company's sustainability journey

### Bespoke Learning Solutions – For Professionals In The Built Environment

The complexity around creating and reinforcing a culture of sustainability requires a multifaceted programme of learning and development, one which recognises the varying levels of engagement and knowledge within an organisation.

For over ten years, and through close consultation with our members, UKGBC has delivered a range of learning programmes for professionals to enhance their technical skills and deepen understanding of sustainability in the built environment.

UKGBC's Bespoke Learning Solutions have supported our membership in fostering a collaborative mind-set – to maximise impact and align with corporate sustainability goals.

Reflecting recognised professional learning principles, UKGBC's Bespoke Learning Solutions are:

- **Customised** – to meet the specific needs of your organisation and appropriate to the knowledge and skill level of participants
- **Practical** – highlighting real-life application
- **Intensive** – because staff time is valuable
- **Interactive** – for a high level of participation and engagement
- **Flexible** – with a range of programme delivery options.

From introductory awareness and knowledge-raising modules accessible to an entire organisation, to more immersive leadership development for select teams, we are able to craft tailored learning experiences to guide your team's sustainability journey.

To find out more about how UKGBC's Bespoke Learning Solutions can support your organisation, please get in touch with our Sustainability Learning Manager Elfrida Hamilton-Russell at [elfrida.hamilton-russell@ukgbc.org](mailto:elfrida.hamilton-russell@ukgbc.org)
