

# Future Leadership Forum

A powerful group convened to inspire and enact  
radical change in the built environment and beyond

## What is the Future Leadership Forum?

In the five years since the Future Leaders and Change Accelerator programme's inception, the alumni community has grown to include over 150 individuals, representing over 75 organisations from the built environment sector. The UK Green Building Council is dedicated to

ensuring that this group has the opportunity to continue this journey with our support. This alumni group aims to continue to work together beyond the programmes to share experiences of sustainability leadership and innovation. In short, it is designed:

To challenge, develop, and inspire the alumni of the UKGBC Future Leaders and Change Accelerator programmes to be their best possible selves.

## What does it set out to achieve?

The objectives of the Forum are to:

1. Create opportunity for members to continue to develop their leadership skills and reaffirm their purpose through formalised learning opportunities
2. Provide a platform for members to exchange knowledge, ideas and inspiration to prepare themselves and their organisations for the future
3. Engage members in driving an impactful programme of work and a shared sense for the need for action to influence system-level change in the sector
4. Cultivate a network of passionate built environment professionals with a collaborative and meaningful mindset
5. Share success and challenges faced, and inspire each other
6. Act as mentors and be mentored, interface with other leaders (including members of the UKGBC Leaders Network) and be involved in wider UKGBC activity

The future leaders programme has enabled me to better communicate the change I want to see and engage people on the sometimes chaotic journey with me. I immediately felt the benefit in my work and continue to do so.
